## Brighten Your Holiday With Dazzling White And Colored Diamond Jewelry

Glittering white diamonds set in glowing platinum, white, yellow or pink gold make a classic holiday gift of stunning beauty. But this season you can also choose from elegant new jewelry designs with the extra brilliance, flair, and excitement of genuine diamonds in a rainbow of breath-taking colors.

These fancy diamond colors are uniquely vivid and lively. That's because only diamonds have the brilliant inner fire that sets them apart from all other gems. Spectacular colors available

today include blue, pink, canary yellow, brown, green, violet, black and the almost impossible to find color of red!

Choose Rings, Earrings, and Pendants encrusted with glittering white diamonds set with colorful accents of pink, yellow, and blue diamonds. Or take your choice of elegant Pendants with large solitaire colored diamond center stones surrounded by fiery white brilliant-cut smaller diamonds.

This season's high-fashion jewelry styles include a variety of geometric designs, the traditional (yet ever popular) three-stone symbols of love, representing the past, present and future as well as the newest gift of love... "Journey" diamonds. Journey designs offer four or more graduated diamonds from smallest to largest and represent how love grows stronger and larger over time.

Whether you choose jewelry with white or colored diamonds (or a combination of both) it's sure to be a gift that will make this holiday extra special!
